                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  US-09-390-324B-2/c

Sequence 2, Application US/09390324B

Patent No. 6342376

GENERAL INFORMATION:
APPLICANT: Kozian, Detlef

APPLICANT: Reuner, Birgit
TITLE OF INVENTION: Two-color differential display as a method for
TITLE OF INVENTION: detecting regulated genes
FILE REFERENCE: 2481-1635
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          ; LOCATION: (1)...(17); OTHER INFORMATION: Description of Artificial Sequence: synthetic; COTHER INFORMATION: "V=A,C,G; N=A,C,G,T"

Patent No. 5614617
GENERAL INFORMATION:
GENERAL INFORMATION:
APPLICANT: Cook and Sanghvi
TITLE OF INVENTION: Nuclease Resistant, Pyrimidine
TITLE OF INVENTION: Modified Oligonucleotides that Detect and Modulate
TITLE OF INVENTION: Gene Expression
NUMBER OF SEQUENCES: 65
CORRESPONDENCE ADDRESS:
ADDRESSEE: No. 56146177is
STRET: One Liberty Place - 46th Floor
CITY: Philadelphia
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   NAME/KEY: Modified-site

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      US-08-922-170B-5/c

Fatent No. 5968022

Patent No. 5968022

GENERAL INFORMATION:

APPLICANT: Iris Pecker, Israel Vlodavsky and Elena
APPLICANT: Feinstein

ITILE OF INVENTION:

TITLE OF INVENTION: HAVING HEPARANASE ACTIVITY AND EXPRESSION OF

TITLE OF INVENTION: SAME IN TRANSDUCED CELLS

NUMBER OF SEQUENCES: 12

CORRESPONDENCE ADDRESS:

ADDRESSEE: Mark M. Friedman c/o Robert Sheinbein

STREET: 2940 Birchtree lane

CITH: Silver Spring
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Gaps

RESULT 278
US-09-300-958A-68/C
| Sequence 68, Application US/09300958A
| Patent No. 6495319
| GENERAL INFORMATION:
| APPLICANT: McIelland, Michael
| APPLICANT: McIelland, Michael
| APPLICANT: Welsh, John
| APPLICANT: Tenkle, Thomas
| TITLE OF INVENTION: Reduced Complexity Nucleic Acid Targets and Methods of
| TITLE OF INVENTION: Using Same
| TILE REPREBLICATION NUMBER: US/09/300,958A
| CURRENT FILING DATE: 1998-04-27
| PRIOR FILING DATE: 1998-04-27
| PRIOR FILING DATE: 1998-08-27
| PRIOR PRILING DATE: 1998-02-04
| NUMBER OF SEQ ID NOS: 85
| SEQ ID NO 68
| LENTH: 15

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              à
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Sequence 2, Application US/09349035

Sequence 2, Application US/09349035

Patent No. 6414135

GENERAL INFORMATION:

APPLICANT: Cook, Philip Dan

APPLICANT: Manoharan, Muthiah

APPLICANT: An, Haoyun

TITLE OF INVENTION: C3'-Methylene Hydrogen Phosphonate Monomers and Related Compounds

TITLE OF INVENTION: C3'-Methylene Hydrogen Phosphonate Compounds

TITLE OF INVENTION: C3'-Methylene Hydrogen Phosphonate Monomers and Related Compounds

CURRENT APPLICATION NUMBER: US/09/349,035

CURRENT FILING DATE: 1999-07-07

NUMBER OF SEQ ID NOS: 11

SEQ ID NO 2

LENGTH: 19

LENGTH: 19
            Sequence 2, Application US/09437076

Sequence 2, Application US/09437076

Patent No. 6261779

Patent No. 6261779

APPLICANT: Barber-Guillem, Emilio
APPLICANT: Nelson, M. Bud
APPLICANT: Castro, Stephanie
TITLE OF INVENTION NUMBER: US/09/437,076

CURRENT APPLICATION NUMBER: US/09/437,076

EARLIER FILING DATE: NUMBER: EARLIER FILING DATE: NUMBER OF SEQ ID NOS: 6

SOFTWARE: Word for Windows
SEQ ID NO 2

LENGTH: 18
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             OTHER INFORMATION: Oligonucleotide
NAME/KEY: misc_feature
LOCATION: (16)7...(19)

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                Sequence 6, Application US/09806254

Sequence 6, Application US/09806254

Patent No. 645838

GENERAL INFORMATION:
APPLICANTION: Advance Hopkins University School of Medicine
TITLE OF INVENTION: Advance Hopkins User Title OF INVENTION: Drug Screening
FILE REFERENCE: 01107.83615

CURRENT APPLICATION NUMBER: US/09/806,254

CURRENT FILING DATE: 2001-03-28

PRIOR APPLICATION NUMBER: US 60/102,186

PRIOR PLING DATE: 1998-09-28

NUMBER OF SEQ ID NOS: 30

SOFTWARE: FRACESQ for Windows Version 3.0

SEQ ID NO 6

LENGTH: 20
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         1.3%; Score 14.8; DB 1; Length 20; 88.9%; Pred. APPLICANT: Karras, James G.
TITLE OF INVENTION: Antisense Oligonucleotide Modulation of STAT3
TITLE OF INVENTION: Expression
FILE REFERENCE: ISPH-0338
CURRENT APPLICATION NUMBER: US/09/288,461
CURRENT FILING DATE: 1999-04-08
NUMBER OF SEQ ID NOS: 107
SOFTWARE: PatentIn Ver. 2.0

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Sequence 305, Application US/09313932A

Patent No. 6228642

GENERAL INFORMATION:

APPLICANT: Baker, Brenda

APPLICANT: Butler, Madeline M.

APPLICANT: Shanaban, William R.

TITLE OF INVENTION: AVTISENSE OLIGONUCLEOTIDE MODULATION OF TNF-

TITLE OF INVENTION: BYPRESSION

FILE REFREENCE: ISPH-0356

CURRENT APPLICATION NUMBER: US/09/313,932A

CURRENT FILING DATE: 1999-05-18

NUMBER OF SEQ ID NOS: 501
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      .

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     US-09-676-610B-155/c

Sequence 155, Application US/09676610B

Patent No. 6444465

GENERAL INFORMATION:

APPLICANT: Uscqueline Wyatt

APPLICANT: Uscqueline Wyatt

APPLICANT: Uscqueline Wyatt

TITLE OF INVENTION: OLIGONUCLEOTIDE INHIBITION OF HER-1 EXPRESSION

FILE REPERCER RTS-0138

CURRENT APPLICATION NUMBER: US/09/676,610B

CURRENT FILING DATE: 2000-09-29

NUMBER OF SEQ ID NOS: 182

LENGTH: 20
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                Sequence 14, Application US/08626285
; Patent No. 648830
; CENERAL INFORMATION:
    APPLICANT: Morris, Macdonald S.
    APPLICANT: Shoemker, Daniel D.
    APPLICANT: Mithmann, Michael P.
    TITLE OF INVENTION: Tag Nucleic Acids and Probe Arrays
    TITLE OF INVENTION: Tag Nucleic Acids and Probe Arrays
